Healthy Environments

Baccharis Chitalpa Xeric

The Healthy Environments collection is inspired by the alluring, soothing colors and textures of species native to the desert Southwest. In addition to their natural beauty, the inherent hardiness of these plants provides a paradigm for perseverance through difficult challenges and environments. Drawing inspiration from these plants and biophilic design, the Healthy Environments collection was created to advance healing and productivity in healthcare interiors.

Baccharis
Chitalpa
Xeric

The Healthy Environments collection incorporates three coordinating carpet plank patterns. *Baccharis* is inspired by the organic fluidity of desert broom plants. *Chitalpa* features an organic grid visual in homage to the utilitarian desert willow branches. *Xeric's* randomly flowing appearance was influenced by the tops of mesquite trees and branches below.

Installation Instructions:

Mohawk Group warrants its adhesives for the life of the original installation only when a Mohawk Group style (product) is installed. Mohawk's floor preparation procedures must be followed to ensure that the substrate has been prepared properly. Failure to use Mohawk Group adhesives or to follow Mohawk's floor preparation procedures will void all lifetime adhesive warranties. Please contact your local Sales Representative for installation guidelines.

These patterns contain inherent characteristics which may result in pattern run off and/or pattern appearance variations at the seams or tile edges (darker or lighter pattern lines). These characteristics are inherent in the patterns and are not manufacturing defects. Consideration to these characteristics should be given when selecting an installation method.

Chair pads are recommended under office chairs with roller casters to preserve appearance retention, act as a deterrent toward delamination and to prevent premature or accelerated wear. Walk-off tiles from the Tuff Stuff II Collection are recommended at entryways to reduce soiling.
