

Social Order

Good Will · Jocund · Social Perk · Amend Art

The Social Order collection combines tonal textures and biophilic design into four unique patterns of various scales. Amend Art is a small-scale crosshatch texture with an upscale attitude. Social Perk brings a bit of nature with leafy shapes without being too literal, while Jocund and Good Will mix larger scale textures with bold visuals. These versatile neutrals in both warm and cool hues make it easy to coordinate with any aesthetic, especially when texture and tactility help to add visual dimension to a space.

Mohawk Group warrants its adhesives for the life of the original installation only when a Mohawk Group style (product) is installed. Mohawk's floor preparation procedures must be followed to ensure that the substrate has been prepared properly. Failure to use Mohawk Group adhesives or to follow Mohawk's floor preparation procedures will void all lifetime adhesive warranties. Please contact your local Sales Representative for installation guidelines.

These patterns contain inherent characteristics which may result in pattern run off and/or pattern appearance variations at the seams or tile edges (darker or lighter pattern lines). These characteristics are inherent in the patterns and are not manufacturing defects. Consideration to these characteristics should be given when selecting an installation method.

Chair pads are recommended under office chairs with roller casters to preserve appearance retention, act as a deterrent toward delamination and to prevent premature or accelerated wear. Walk-off tiles from the Tuff Stuff II Collection are recommended at entryways to reduce soiling.

Mohawk Group is providing this architect folder for the purpose of promoting our commercial business. This folder and its samples shall remain the property of Mohawk Group. Color may vary from dye lot to dye lot. Substitution of material may be made due to improved technology, supply limitations or other factors. The performance of this product is not affected by such variations.
